Scapa Visual Communications & Signage Solutions

Scapa Acrylic Foam Tapes (AFT) / Acrylic Film Foam Tapes (AFFT) are the ideal solution for permanent fastening, bonding and fixing of materials used in the manufacture of commercial and LED signage.

The manufacturing and assembly advantages of using Scapa tapes include a broad range of adhesive strengths and thicknesses, cost savings from traditional fastener replacement and an overall reduction of labour and production costs.

Features & benefits:

- For indoor and outdoor applications
- Simplifies and speeds assembly
- Seals and bonds in one application
- Replaces liquid adhesives, fasteners and conventional tapes
- Superior UV resistance and environmental properties
- Allows differential thermal expansion
- Heat resistant to light source
- Bonds low and high surface energy substrates
- Good plasticizer resistance
- Conforms to a wide variety of surfaces

Scapa's broad portfolio of high strength adhesive systems are optimal for the permanent bonding and mounting of metal, glass and plastic in both indoor and outdoor construction and installation environments. These products are ideal for use in the manufacture, maintenance and repair of traditional commercial and LED signage systems. Additional protection, masking, joining, splicing and wrapping products complete the Scapa construction portfolio.
